Traffic safety lessons for children

Traffic safety education

In order to prevent traffic accidents and realize a safe and comfortable traffic environment, each and every one of us should increase our awareness of safety by following all traffic rules and be kind and considerate on our nation's roads.

The TMPD offers a wide range of participatory and interactive traffic safety lessons practical for all ages in an effort to raise traffic safety awareness.

Traffic accidents in Tokyo

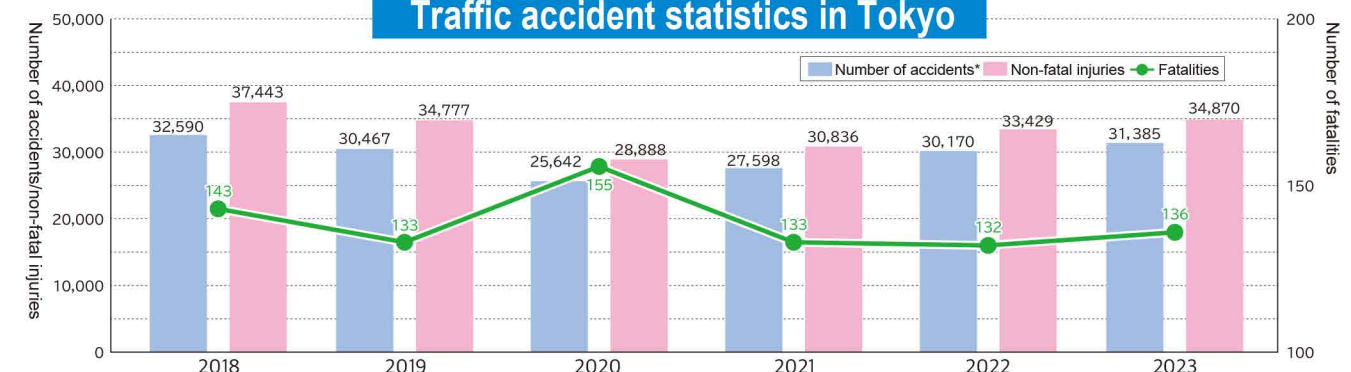

In 2023, the number of traffic accidents, fatalities, and injuries in Tokyo exceeded that of the previous year.

Statistics show that elders aged 65 or over make up approximately 34.6% of all traffic-related deaths, and approximately 40.4% of deaths are of pedestrians.

Scan the 2-D bar code for more information on traffic accident prevention (only in Japanese).

Traffic accident statistics in Tokyo

*The number of traffic accidents indicates accidents resulting in injury or death (property damage accidents not included).
