Crime Prevention Web Simulator "Methods for the Future"

The simulator, distributed from October 2022 to March 2023, allowed users to easily learn about crime measures on their smartphones or other devices.

VICTIM PROTECTION/RELIEF TASK FORCE

HANDLING CASES RELATED TO PERSONAL SAFETY

When handling cases related to personal safety (such as when it is necessary to protect the victim immediately, as in instances of stalking, domestic violence, missing/abducted people, abuse of children, the elderly or disabled, and precursory cases that may lead to sexual crimes against children or women), the TMPD takes protective measures to ensure the security of victims and involved parties, and works to promptly identify and catch the perpetrators.
