

# COMMUNITY SAFETY BUREAU

## PREVENTING JUVENILE DELINQUENCIES AND FOSTERING SOUND GROWTH

### Supporting and protecting juveniles

In cooperation with local communities, schools, and relevant agencies and organizations, the TMPD is working to protect juveniles from misconduct or victimization on social media. Moreover, in order to create "the society that does not produce juvenile delinquents", we try to ease juveniles' anxiety and foster their sense of discipline by increasing our efforts on juvenile guidance and encouraging more juveniles to seek advice from counsellors.

Furthermore, when handling a child abuse case, the TMPD works closely with relevant organizations and exchange information. Our top priority is to ensure the safety of the children involved.

### TMPD Juvenile Centers

To prevent juvenile delinquency and promote the healthy growth of juveniles, the eight TMPD Juvenile Centers in Tokyo encourage juveniles to participate in social activities, including volunteer activities and various hands-on activities such as agricultural experience. We strengthen ties with local communities and promote the creation of a society with no juvenile delinquents and victims.

The Centers also employ counseling specialists including psychologists trained to provide services tailored to young people.

# CYBER SECURITY CONTROL TASK FORCE

## REALIZING A SAFE AND SECURE CYBERSPACE

Cybersecurity Campaign

Cyberspace is evolving into a public space due to advancement of digitization and other factors. On the other hand, there has been a spate of damage caused by ransomware and tech support scams.

To ensure the safety and security of cyberspace, the TMPD is promoting activities that prevent cyber crimes, including dissemination of information through social media and holding practical seminars.
