

Beware of Investment Fraud on Social Media!

You could be a target for fraudsters!

Common scheme is as follows:

■ They send you messages on social media.

- “We are from the same country.”
- “I’m an exchange student too.”

➡ They give a false sense of affinity to you.

■ They invite you to start investing

- “There is a good project.”
- “Do you want to start investing?”
“I’m already doing it.”
- “You can definitely earn money.”
- “I know some investment websites for you.”

➡ No return is guaranteed in investment.
It is a sign of fraud.

■ They request you to send money

- They might give you a small amount of money as a return.

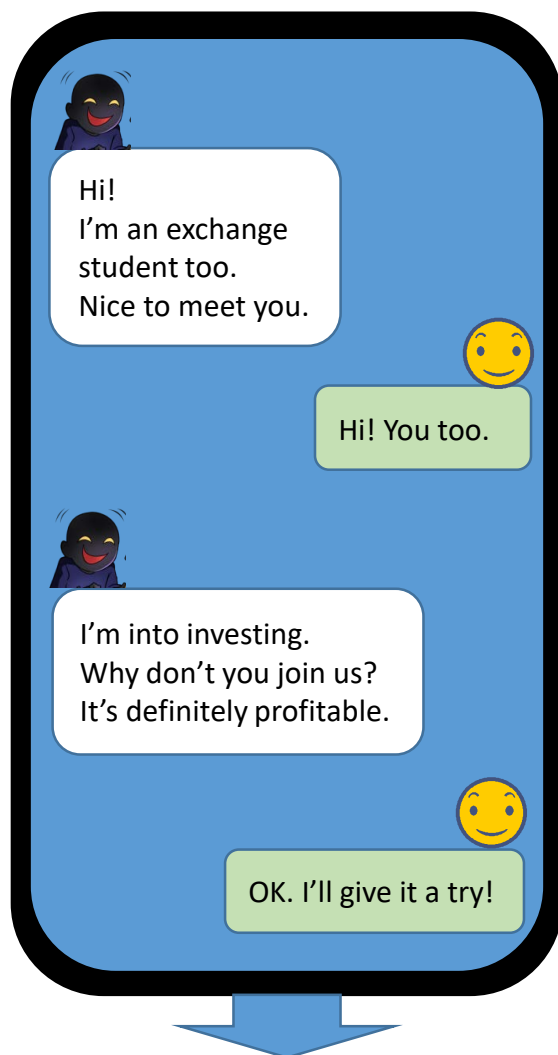

➡ This is a part of their scheme.
You will not get a second payout.

- They say, “You need to send more money to earn more,” and ask you to transfer more.

■ You realize you were scammed

- You cannot contact them any more.

➡ You will never get your money back!

Once you send money to them, you lose contact with them. 😞

In order to live safely in Japan:

- Do not trust people online.
- If you are invited to invest, talk to your family or friends.
